PROJECTS

E-Commerce :: Online platform for shopping. [Code](#)

- I built it using React.js, Redux, and JavaScript. For the backend, I used Node.js and Express.js. For data storage, I used MongoDB, and for email functionality, I used EmailJS. It's a comprehensive e-commerce platform.
- It also includes features like secure payment gateways, user authentication, and a product search function

Spotify Music Lite : Online Offline Music Platform [Live](#)

- I built a lite version of a Spotify clone using React.js, JavaScript, and Redux Toolkit. The design is styled with
- Tailwind CSS. It includes features like music playback, playlist management, and user authentication. This project demonstrates efficient state management and responsive design.

Resume Builder : This is resume builder Web app [Code](#)

- This web app, a Resume Builder, is crafted with React.js, CSS, and JavaScript. It utilizes templates to create
- professional resumes efficiently. Users can easily customize layouts and content, showcasing their skills and experiences effectively
